Subject: Collins Help

I have a 500 Kc IF-AF AM Amp board from a Collins set that I cannot identify.
It is on a plug in card with the following part number / ID data:

Collins PN: 528-0238-005

It is part of a set with the following

Air Force T0: 31R2-4-217-1, 15 Jan 63.

Any help with the nomenclature of the set from which this module comes?

Jim tells us:

> TV, RADIO TO GET INSTANT DISASTER ALERTS

<rest deleted for space>

At first glance I was tempted to make a wiseacre remark like "I thought the cold war was over" but I guess this can be used for natural disasters. I'm too young to remember Conelrad (although I do remember AM radios having those little triangle markings on the dial to show you where to tune "in case of an emergency!!")

This message was only a test. We now return you to your regularly scheduled program.

I also greatly appreciate the job that these folks have done (and have sent e-mail to that effect).

Perhaps, though, it would be nice for us to send personal notes of appreciation, rather than have each of us flood the others' mailboxes with list-wide notes of gratitude.

One more time ... who were the responsible parties and their e-mail addresses?

(Ok ... I'm the "Grinch" ... but a *practical* Grinch)

Bill

Subject: ELDICO R-104 SSB Receiver

I own a neat compact tubed SSB Communications Receiver, made by

Radio Engineering Labs under the name "ELDICO" around 1962.

It is all grey in color, and closely follows the classic lines of a Collins receiver of that era. The model designation is R-104 and a small interior plate also says: "Part of S-119 SSB Communications System".

I would appreciate hearing from anybody who is familiar with the set and some idea of what it might be worth.

BTW, the top splits in half and opens for servicing. Strictly a military set.

Thanks

Subject: Re: ELDICO R-104 SSB Receiver

It is my understanding that Radio Engineering Labs second sourced a clone of the S-Line for the military in the 60s - the 75S-3 begin designated the R-104.

They also tried to sell these units to hams, but I believe that Collins forced them to stop shortly after REL began to market the set.

Subject: Electric Radio

Thanks to all who responded to my query about Electric Radio. Check will be in the mail today. I love this group. You guys are what ham radio is all about, at least the ham radio I remember as a kid.

Another request. I want to use my Drake C-line on Air Force Mars. I need a 15.6 crystal to get it to cover the 4.5 - 5.0 Mhz range. If anyone has one they no longer want, please let me know and the price. Otherwise, I am sure I can get it from Jan Crystal or some such place.

Thanks again. Bob AC4Q0

OFFICE MEMO	Need a Transceiver	Date: 12/19/94

I have a desperate need for an HF transceiver, something on the order of a HW-101, Tempo 1, etc. In other words, inexpensive! If you have something that might work, let me know. P.S.- it does not need to have a working XMIT section, for now. This will be used as an incentive for a future ham. 73, Scott

Jack, Steve, Larry, Nick, Kevin, Phil, Jim, Paul, Jim and the whole
Boatanchor gang,

I can't help but think that a big reason things went so well with
the mailing list move, is that as a group, we're a careful bunch,
confident and comfortable with the routine of warm up -> peak the
grid -> dip the plate -> adjust the load -> listen before you transmit.

Bravo for the silky-smooth transition!
